## EDUCATION

### Ain Shams University

Cairo, Egypt

*Bachelor of Engineering, Computer and Systems Engineering*

*September 2022 – June 2027*

- **Cumulative GPA:** 3.54 / 4.00
- **Relevant Classwork:** Data Structures and Algorithms (C++), Object Oriented Programming(JAVA)(OOP), Computer Networks, DBMS, Operating Systems, Deep Learning, Distributed and Parallel Systems, Artificial Intelligence

## PROJECTS

### Distributed Online Marketplace | C#, .NET, React, MariaDB, Docker, WebSocket, Web Application GitHub

- Led a 12-person team in developing a distributed online marketplace using C#/.NET 8, React 19, and a sharded MariaDB architecture.
- Architected the distributed system and federated database, implementing horizontal hash-sharding with MariaDB Spider Engine across 3 data nodes and a central coordinator.
- Containerized the 4-node database cluster using Docker Compose on an isolated bridge network, configuring 512MB/256MB memory limits and automated failover testing.

### Vezeeta Pulse | Python, Scrapy, Pandas, FAISS, Flask

GitHub

- Led a 10-person team in building an end-to-end data intelligence pipeline analyzing 17,119 healthcare provider profiles from the MENA region.
- Engineered a resilient Scrapy crawler covering 1,640+ directory pages with rate limiting and recovery mechanisms.
- Analyzed provider data using Pandas, NumPy, Matplotlib, and Seaborn, identifying geographic pricing variations and specialty shortages across 140 areas.

### XML Social Network Analyzer | C++, Qt 6, Graphviz, CMake, XML, Byte Pair Encoding

GitHub

- Led a 9-person team in developing a C++ desktop application with GUI/CLI interfaces for parsing, validating, compressing, and analyzing social network XML data.
- Designed a stack-based XML verification algorithm with a heuristic-based correction module for detecting and repairing structural errors.
- Built a custom Graph data structure and integrated Graphviz to generate interactive visualizations for social network analysis.
- Implemented Byte Pair Encoding (BPE) compression alongside XML formatting and search functionality.

## TECHNICAL SKILLS

**Languages:** Java, Python, C/C++, SQL, Go, HTML/CSS, CUDA

**Developer Tools:** Git, Docker, Linux, Unix

**Concepts:** Problem Solving, Object-Oriented Programming(OOP), Database Management, Machine Learning, Natural Language Processing

## CERTIFICATIONS & ACTIVITIES

### Computer Vision Program — NTI

Intensive training in Deep Learning and Computer Vision, covering CNNs, Transfer Learning, Object Detection, Semantic & Instance Segmentation, Image Classification, and Face Verification.

### Machine Learning Specialization — Coursera

Training in Supervised & Unsupervised Learning, Classification, Clustering, Model Optimization, and Feature Engineering using Python and NumPy.

### Data Science Program — ALX Africa

Training in Python, SQL, Data Analysis, Data Visualization, and Power BI

### System Programming in Linux — Udemy

Hands-on training in Linux internals, system calls, process management, ELF, memory handling, and I/O; built Unix utilities and mini shells in C.

### HCDG, Ain Shams University

Assisted in organizing technical events and workshops and supporting technical sessions.
